Professional Design Exceptional Performance

Crafted with precision, this racket features a high-quality plywood blade for optimal speed, control and stability. The professional-grade rubbers ensure a superior grip, enabling precise spins, powerful shots and excellent ball control. Where style meets performance, this racket is perfect for players who demand both elegance and skill in their game.

SPECIAL EDITION:

Atemi rackets inspired by three powerful elements

WAVE

dynamic and fluid,
channeling precision and flow

SPACE

bold and refined,
embodying limitless ambition

FLAME

vibrant and fierce,
igniting unstoppable energy

5000 BALSA-CARBON

4000 BALSA

3000 CARBON

Thanks to the BBS (Best Balance System) technology in the handle, the center of balance of the rackets moves closer to the center of the "sweet spot" making the strokes much faster.
A special kind of light and elastic sponge with micro bubbles increases the catapult effect of the rubber coverings.

BBS
Best Balance System

Благодаря применению в ручке ракетки технологии BBS (система наилучшей сбалансированности), центр тяжести ракетки смещается ближе к середине активной игровой зоны, что значительно ускоряет удар. Особый вид лёгкой и упругой губки с микропузырьками, увеличивает катапультирующий эффект резиновой накладки.

ATEMI has achieved a real breakthrough in the Table Tennis rackets and blades technology. We have redesigned the blade significantly improving racket characteristics.

The rigidity of the blade is enhanced by specially designed handles, which act like "springs" at both sides making the blade much more powerful and greatly improving ball control.

ATEMI совершила настоящий прорыв в технологии ракеток и оснований для настольного тенниса. Мы значительно изменили дизайн основания, что позволило улучшить игровые характеристики.

Жесткость основания была улучшена за счёт специально разработанных ручек, которые действуют как пружины с обеих сторон, делая основание более мощным и улучшая контроль мяча.
