

RUBBERS

MAX ATTACK

A competition rubber, which combines excellent speed with maximum possible spin and control characteristics for the attacking play. Try it once and you will like it!

MAX

The rubber for offensive players who look for high speed and excellent control and spin characteristics, which make this rubber one of the best.

VERSUS

The ideal rubber for the player at the beginning of his career. It allows the player to produce great spin and control the ball.

BLACK SPIN

Extremely grippy rubber surface absorbs the opponent's spin and enables the player to make prompt counter attacks.

ULTIMATE FIGHTING

A high quality rubber provides excellent combination of speed and control. Perfectly ideal for the modern attacking player.

Donier offers the complete range of top quality table tennis blades. The handles are made of the highest quality natural non-dyed wood blending perfectly with the whole blade to give outstanding feel and touch. Professional finish combined with excellent playing characteristics put Donier blades at the forefront of table tennis blade manufacture.

DEFENSIVE

Speed – 4 / Control – 10
5-ply blade (oversize) 70-75 gr.

The best blade for the players who choose defensive style to win. The blade has two special softening layers to give the blade maximum control of the ball.

ALLROUND

Speed – 6 / Control – 9
5-ply blade, 70-75 gr.

The blade with excellent feel of the ball for modern allround players. Well suited for all playing strategies.

B L A D E S

BALSA CARBON OFF+

Speed – 10 / Control – 8
5 ply +2 carbon layers, 70-75gr.

Extremely fast Blade! The best choice for the players who prefer aggressive attacking play. The unique combination of Balsa and Carbon give the blade unbeatable speed and increase the "sweet spot" of the blade. This is one of the best offensive blades in table tennis world.

BALSA OFF+

Speed – 10 / Control – 7
5-ply blade, 65-70 gr.

This is an extremely fast blade! This blade is excellent for players who demand intensive attacking play. The quality and lightness of this Balsa blade show the highest possible speed without losing too much control.

CARBON OFF

Speed – 9 / Control – 8
5-ply +2 carbon layers blade, 80± 3gr.

Optimal thickness of the carbon fibers in combination with specially selected directions of plies give the blade excellent speed and control characteristics. Designed for attacking playing strategy.

Natural non-dyed wood

BBS

Best Balance System

Thanks to BBS (Best Balance System) technology in the handle the center of balance of the rackets moves closer to the center of the "sweet spot", which makes the strokes much faster.

ALLROUND+

Speed – 8 / Control – 8
5 ply blade, 70±3 gr. Hollow handle

Designed for the players who can successfully combine good speed and control. The blade has a hollow handle, which makes the blade well balanced

BBS

OFFENSIVE

Speed – 9 / Control – 7
5-ply blade, 80-85 gr. Hollow handle

Blade with excellent speed and control characteristics for dynamic offensive players. This blade also has a hollow handle, which makes the blade well balanced and reduces its weight.
